

# LILIUM # 1

## Components:

1. 3 x Lillum w/f pots diff. heights.
2. Nimecea pond.
3. 20mm flex tubing 4m joined together.

## Recommended pump:

Flow rate: 2200 l/h; 580GPH  
Pump head: 900mm; 3.0ft  
Example: 'Hydro 3000'

## Note:

The water supply to the two lower pots may need to be choked somewhat to achieve even flow for all three pots. This can be done by placing a stone partially over the opening spouts or by pinching the tube after having wound a wire around it a few times.
